Summary Narrative

Type of Distribution Consolidated: Destinating

Gaining Facility Name and Type: Pittsburgh P&DC
Current SCF ZIP Code(s): 150-154

Background:

The Western Pennsylvania District, with the assistance of the Eastern Area, has completed the First Post Implementation Review (PIR) of the Area Mail Processing (AMP) that consolidated destinating mail from the Washington PA CSMPC 153 into the Pittsburgh PA P&DC. The data for the Pre-AMP period was July 1, 2010 through June 30, 2011 and included all destinating operations for the Washington PA CSMPC and the Pittsburgh PA P&DC. The transfer of destinating mail was completed July 14, 2012. The data for the six-month PIR is October 1, 2012 through March 31, 2013.

Financial Summary:

	PIR vs. Pre-AMP	PIR vs. Proposed
Total Annual Savings	**($2,071,471)**	**($2,401,076)**
Total First Year Savings	**($2,078,991)**	**($2,362,856)**

While the PIR identifies that this AMP is not meeting the expectations of the approved AMP, there were concurrent activities that were not accounted for in the AMP workbook. The first PIR includes impacts that can be attributed to the following concurrent events that occurred after the completion of the AMP package and whose impacts are not reflected in the Pre-AMP base periods for either site for the AMP:

- Greensburg AMP, implemented July 28, 2012, with a proposed increase to Pittsburgh's F1 operating costs of approximately $1,574,022.
- New Castle AMP, implemented August 11, 2012, with a proposed increase to Pittsburgh's F1 operating costs of approximately $4,151,272 and to Pittsburgh's management costs of $343,180.

The above identifies costs to the Pittsburgh P&DC of approximately $6,068,474 over what was proposed in the AMP. There were other initiatives such as the relocation of the parcel and bundle sorting operation from the Pittsburgh P&DC to the Pittsburgh L&DC which resulted in a 30,748 hour workhour transfer, equating to a savings of $2,521,372 that was unrelated to the AMP and PVS transportation savings of $426,399 which were also not related to the AMP. **Adjusting for the various activities and initiatives, which total $3,120,703, the adjusted first year savings is $1,041,712, above the expected savings of $283,865 for the AMP.**

Customer Service Considerations:

The EXFC overnight, 2-day and 3-day mail service performance is shown in the workbook for Washington CSMPC and the Pittsburgh P&DC. The Washington overnight fell for Quarter 1, 2013 but has rebounded to a 97.39% for Quarter 2, 2013. The issue has been the 3-day for Washington. The Pittsburgh P&DC has instituted new tracking procedures to make sure that this mail is clearing timely, every day.

There were no changes to the retail or business unit at the Washington facility.

Transportation Changes:

The first year transportation savings of $407,760 is a result of an increase of $18,639 in HCR costs for HCRs 15333-A, 15337-A and 26012-A and a PVS savings of $426,399 which was not related to the AMP.

Staffing Impacts:

The approved AMP proposed a reduction of 18 craft employees in Washington and an increase of 11 craft employees in Pittsburgh, resulting in a net decrease of 7. The AMP proposed a reduction of 1 EAS employee in Washington and added no EAS to Pittsburgh. Complement data at the end of the first PIR shows that the Washington and Pittsburgh combined realized a reduction of 86 craft employees and 14 EAS. The craft employee reduction is skewed by the clerk retirement incentive, especially in the Pittsburgh P&DC. Additional employees on rolls are expected before the end of the final PIR period.

Maintenance Impacts:

The total Proposed AMP maintenance savings were $54,560 vs. the first PIR cost of $165,122. The higher than expected maintenance costs at Pittsburgh are due to concurrent AMPs. Additional impacts to the higher maintenance costs are due to local maintenance personnel relocating the equipment between facilities.

Equipment Relocation and One-Time Facility Costs:

There was a projected one time cost of $45,740 for equipment relocation. Only $7,520 is being reported for equipment relocation which was for parts related to the equipment move for this AMP. The labor costs for the equipment moves are included in the maintenance workhours and the transfer of equipment between facilities was done via existing postal transportation.

Summary:

Adjusting for the concurrent initiatives identified in the financial summary which total $3,120,703, the **projected first year savings for the Washington AMP is $1,041,712**, which is above the AMP's projected first year savings of $283,865.
